## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application is in condition for allowance except for the presence of claims 73-95 directed to groups II and III in the restriction requirement mailed 8/11/2011, non-elected without traverse. Accordingly, claims 73-95 have been cancelled.

### ***Response to Arguments***

2. Applicant's arguments, see "Remarks", filed 3/7/2012, with respect to claims 1-4, 6-30 and 34-72 have been fully considered and are persuasive. The 35 USC 102(e) and 35 USC 103(a) rejections of claims 1-4, 6-30 and 34-72 have been withdrawn.

### ***Allowable Subject Matter***

3. Claims 1-4, 6-30, 34-72 and 96 are allowed.

4. The following is an examiner's statement of reasons for allowance:

5. In regards to claims 1 and 96 (the independent claims of the instant application), though Yoshida et al. (U.S. Patent Application Publication Number 20050152588, from hereinafter "Yoshida") teaches a method of centerline determination for a tubular tissue in a medical image data set defined in a data space (paragraph 0109 and the abstract, etc., teach the colon, which is tubular, paragraph 0109 likewise teaches the data set), receiving at least one start point and one end point inside a tubular tissue volume (paragraphs 0097, 0137, 0330, etc.), automatically determining a path between said points that remain inside the volume (paragraphs 0097-0098, 0158, 0239, etc.), automatically segmenting said

Art Unit: 2881

tubular tissue using said path (paragraphs 0097-0098, 0155, 0239, 0288) and automatically determining a centerline for said tubular tissue for segmentation (paragraphs 0097-0098, 0155, 0239, 0288) wherein said receiving, said determining a path, said segmenting and said determining a centerline are all performed on a same data space of said medical image data set (the specification gives no indication that there is a data-space change), Yoshida fails to teach using targeted marching which uses a cost function incorporating both past cost and estimated future cost. Though Xing et al. (U.S. Patent Application Publication Number 20020100009, from hereinafter "Xing") does teach calculating cost functions (abstract, paragraphs 0014, 0057 and 0061), Xing fails to teach using targeted marching which uses a cost function incorporating both past cost and estimated future cost. Similarly, though Gerard et al. (U.S. Patent Application Publication Number 20020136437, from hereinafter "Gerard") does teach both segmentation and estimating path costs (claims 3 and 8), Gerard fails to teach using targeted marching which uses a cost function incorporating both past cost and estimated future cost. Claims 2-4, 6-30 and 34-72 are allowed by virtue of their dependency on the allowed base claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
